CAPABILITIES STATEMENT

Evolution Recycling is a family owned Electronic Waste Recycler based in San Diego, California. Established in 2009, Evolution Recycling's business model is designed to deliver personalized, convenient and profitable recycling programs to regional military, government and large corporate institutions in Southern California.

For over (6) years, Evolution Recycling has been managing the recycling and compliance needs for over (20) of the largest government facilities in California, in addition to some of the biggest government contractors in the region.

Services

Evolution Recycling only accepts non hazardous materials while specializing in surplus, empty and new Ink and Toner Cartridges. In addition to printer supplies, our company manages computer assets and scrap metals.

By limiting the type of recyclables we accept, Evolution Recycling is able to minimize overhead, decrease operational expenses and, in turn, share a greater profit with our clients.

Profit Sharing

Our program is a profit sharing model where instead of being paid a flat rate for your recyclable -- we offer a significant percentage of the final sale value. As a result, all of our services are provided at absolutely ZERO COST to participating organizations.

Customer Support

With over (22) years combined industry related experience, the knowledgeable staff at Evolution Recycling will assist with all related support materials needed to implement, grow and maintain an efficient and profitable recycling program.

Local Sustainability

Evolution Recycling is a company born and raised in Southern California. Our employees, facilities and company philosophy all revolve around sustainable practices and supporting local businesses in San Diego County.
